RKR Group Digital Billboard - User Manual

Before you begin

Create an account and sign in. You will need a video file, your requested booking dates, daily run times, and a payment reference number to submit a booking.

Create a booking

1. Select Create New Task.
2. Enter a task title and upload the video advertisement.
3. Set the Start date, End date, and one or more Daily run times.
4. Select either a custom plan or a package plan.
5. Choose a payment method, enter the payment reference number, and tick the payment confirmation box.
6. Select Submit to create the booking.

The system checks that the requested date range is not already booked. If any date in the range is unavailable, select different dates before submitting.

Payment status - important

The payment options currently displayed in the application (PayMongo, GCash, Maya, and bank transfer) are not yet connected to a live payment service. Selecting a method does not process, verify, or transfer payment.

For now, the payment reference number and confirmation checkbox are recorded with the booking as a payment-submission record. Payment must be verified manually by an administrator before it should be treated as completed.

Do not rely on the application’s "paid" confirmation alone as proof that a payment was received.

View a booking

Your bookings appear in the task list with their date range, daily run times, selected plan, video link, and payment reference.

Administrator guide

Administrators can use Bookings Calendar to see each booking on every day of its reserved date range. Select a calendar day to view the customer, plan, price, schedule, and daily run times.

Administrators should manually confirm payment using the payment provider or bank before scheduling the advertisement for delivery.
